## 75 Years of Experience in Technical Textile

The foundations of Tarpa Textile, one of the leading companies in the sector, were laid in 1950. The journey that started with the production of fabrics in the field of technical textiles, continues today with the manufacturing of ready-made clothing and accessories by leveraging its expertise and experience on technical textiles. From modeling to fabric cutting, from sewing to packaging, we use our broader capabilities in all the phases of production to meet all the needs of our customers.

As Tarpa Textile, we always provide the best quality products putting the usability and durability ahead. In addition, we conduct honest pricing policy by carefully analyzing the needs of our customers.

With more than 150 experienced employees and a wide network of suppliers, we continue to invest in the sector and improve ourselves by adding values to our products and services.

T A C T I C A L

## Our Facility

We have the manufacturing capacity of every size and amount in our modern facilities with 5000 m2 closed area. Serving mainly to military and charity organizations, we have recently started to produce products for civilian use.

With our prominent products such as tent, ballistic vest, bag, sleeping bag, vehicle cover, poncho, we can produce any product for different use and purpose. We carry out our production activities in accordance with **ISO 9001** Quality Management System standards.

## Our Service

Manufacturing as our core offering, we also provide training and consultancy services to our customers. In addition, we support our customers for the supply of sectoral products leveraging our expert team on trade and shipment operations.

We have a wide range of products covering military, charity and civilian use.

### Manufacturing

From model design to cutting, from sewing to packaging, we provide manufacturing services at all stages of the process.

### Trade

We export and ship your products with our professional trade department.

### Training & Consultancy

We provide consultancy, equipment supply and training support in technical textile and production line installation areas.
